

# Fibre GPS Link System

## Key Features

- Minimal Loss over long cable runs.
- Secure and Interference free link through “noisy” environment.
- 5V DC Feed to antenna.
- 1U Rackmount unit for direct interface to time server.

## Applications

The Global Professional Fibre GPS Link System, enables the use of a remote or distant GPS antenna over long cable runs at minimal signal loss.

## Specification

Frequency Bands	: L1, 1575.42 MHz : L2, 1227.60 MHz
Antenna Connector	: TNC female
Optical Connector	: FCPC
Fibre Mode	: Single
AC mains Operation	
Optional DC Operation
